Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE THREE MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, such period shall, by default, expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Office Action Summary

Art Unit: 2811

Claims 14-16, 24, 28, 32, 37, 40, 43, 48 and 51 are rejected under 35 U.S.C. 112, second and fourth paragraphs. It is unclear how the claims further limit the electroluminescence display device of claims 1-3, 17, 25, 29, 33, 38, 41, 44 and 49. This rejection could be overcome if each of the claims were put in independent form including the limitations of the claims on which they depend.

Claims 14-16, 24, 28, 32, 37, 40, 43, 48 and 51 are rejected under 35 U.S.C. 112, first paragraph. The listed "electronic" devices are not clearly described to enable a person skilled in the art to make and use the devices. Figures 16 and 20 may be sufficient for a design patent but not for a utility patent.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2811

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 2, 5, 6, 17, 18, 20, 23 and 25-27 are rejected under 35 U.S.C. 102 as unpatentable as shown by Tang et al '365 *of record*. The "channel" and "impurity" regions read on inherent subportions of a channel in TFT1 of Tang et al (Figure 2).

Claims 1, 2, 5, 6, 17, 18, 20, 23 and 25-27 are rejected under 35 U.S.C. 102 as unpatentable as shown by Hosokawa Japanese document 10-189252 *of record*. The "channel" and "impurity" regions read on inherent subportions of a channel in transistor 21 of Hosokawa (Figures 2, 3).

Claims 14-16, 24 and 28 are rejected under 35 U.S.C. 103 as unpatentable over Tang et al '365 and Hosokawa Japan document 10-189252, considered together. It would have been obvious to use pixels as in Tang et al (Figure 2) and Hosokawa (Figures 2, 3) in order to achieve flat panel displays for known electronic devices as claimed.

The arguments in the response, filed 21 November 2001, have been considered but are not wholly persuasive. Contrary to the response (pages 14-15), the rejected claims are not limited to a "multi-gate structure".

Art Unit: 2811

Claims 3, 4, 7, 10, 29-31, 33-36, 38, 39, 41, 42, 44-47, 47, 49 and 50 are allowed. Moreover, claims 8, 9, 19, 21 and 22 are objected to as dependent upon rejected claims but would be allowable if claims 8, 9, 19 and 21 were each put in completed form as independent claims including all limitations of claims 1, 8; 2, 9; 17, 19; 17, 21.

This action is **FINAL**.

This action is a **final rejection** and is intended to close the prosecution of this application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed. The Notice of Appeal must be accompanied by the required appeal fee of appropriate amount.

If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier.

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing, whichever is longer, of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final

Art Unit: 2811

rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication should be directed to G. Munson at telephone number (703) 308-4925 or 0956.
